

## Principles of Nationalist Alternative

### Preserve true human diversity and difference

True diversity is a world of difference not a globe of people all with the same religion, same culture, same political system, same ethnicity, same race and same ways of living.

In contrast to liberalism's homogenized world of fractured cultures and peoples, Nationalist Alternative advocate a harmonious heterogeneous world of homogenous peoples, each rooted in their own culture and soil.

Australians need a nation run by the people for the people not the current liberal "state" detached from reality. It is taken as a given that Tibet has the right to protect its autonomy & identity both as a ethnic group and culture from the forced migration of thousands of Han Chinese into its territory or similarly for Fijians to remain the majority on their small island. We advocate the same right for European nations and in our case Australia.

### Rebuild communities

Communal identity is formed by ties of ethnicity, common ancestry, history, religion, language and culture.

Today's society has been fractured by rampant international capitalism & divisive social engineering like multiculturalism, which has fuelled isolation and individualism. People have been slowly transformed into consumers living within their 4 walls, coveting possessions over participation as fellow members of a organic polis.

Neighbourhood interaction, community markets, volunteering and a renewed sense of local & national self-esteem via direct democracy initiatives such as CIR -Citizens Initiated Referendums.  
*Placing people before the political party machine.*

### Education— *Liberate our children*

Celebration not the current teaching of shame and guilt for Australian/Western culture, heritage and national achievements will engender a sense of belonging and shared purpose. An end to indoctrination and self hate inflicted on our people.

### Rejection of Universalism, egalitarianism, imperialism and championing of true Diversity

Universalism and radical egalitarianism are the antithesis to diversity and self determination with its totalitarian & reductionist insistence on reducing humans to a basic homogenised set of components. It is a dangerous concept that should be recognised for its intolerance— all universal creeds hold they are the one sole source of truth, and hence are also both totalitarian & imperialistic.

Each universal creed armed with its sense of superiority seeks to coercively spread its "truth/dogma" on the world, mentally by shackling free thought (*that which falls outside its defined spectrum*), emotionally (*media manipulation to create desired responses in populations to situations like guilt for European Identity or fear to justify invasions*) and often physically in the case of US style military enforced Liberal-Democracy on Iraq.

Universalism replaces the community or tribe with its unique differences with the abstract 'Man' or 'Citizen' or 'Consumer'.

### Resist Universal creeds such as

Capitalism, liberalism (political correctness) & Communism

All three pose as rival choices but all result in the "universal and homogeneous state" and subjection of humanity's identities to one amorphous mass.

**Liberalism** is best represented by the liberal-democratic state existing in most western nations today. A system of authoritarian multiculturalism, coercive integrationism and state-managed "equality", with the state peering into every corner of society to make that no one is ever discriminated against.

It presents as a false dichotomy of choice: that of Labour/Democrat (left liberal) or Liberal / Republican (right liberal or neo-con) essentially the same individualist internationalists.

Both push one world and no borders whether for 'humanist' or 'economic' reasons. It is no surprise that the big business '50million people by 2050' plan for Australia sits just fine with far left and refugee groups who advocate abolition of borders.

Socially its creed is secular humanism with its intolerance of anyone who questions the logic of its social engineering (political correctness), enforcement of its views through a growing police statism (anti free speech legislation) and emphasis on hyper individualism, the absolute pursuit of self interest over a shared cultural identity and societal responsibility.

Characterised, economically by its devotion to the market, privatisation and laissez faire principles.

### Delayed Gratification for future generations

Nationalist Alternative upholds the principle that

"A society grows great when old men plant trees whose shade they know they shall never sit in"

To this end, we reject only living in the present & worship of hedonism/personal pleasure as ends in themselves and posit that sustainability of bio-diversity whether animal, plant or human requires protection and preservation of environmental, ethnic & cultural diversity now.

## **Culture over Commerce - The Economy**

**"The economy is not an end in itself. It is an element in the life of societies, among the principal ones but only one element"**

Nationalist Alternative does not oppose free enterprise, only a dog-eat-dog international capitalism "unaccountable to anything other than the bottom line."

Unbridled free market zealots have sought to replace traditional forms of social organisation like family, tribe & ethnicity with economically rational robots based on function and efficiency alone

As recent world events have displayed, free market fundamentalism with its policies of little to no government intervention and self-regulating markets guided by the "invisible hand" has sorely failed Australia and the world.

Arrogant free market governments are now being forced to nationalise their financial institutions to attempt to save economic liberalism whilst in the process socialising their losses to society.

**"I would like to see a society with a market, but not a market society."**

Against both the liberal creed of laissez-faire and the left's hyper egalitarian statist concept, Nationalist Alternative favours an organic economic system in which market activity is geared to the general well being.

For this reason we advocate a recontextualization" of the economy within "life, society, politics, and ethics" in order to make it a means rather than simply an ends.

The economy must be subjected to the political will not unchecked deregulation. Hence it's usefulness correlates with its utilisation. Utilised as a tool for elevating the quality of the people, sustaining innovation and creativity.

### **Globalization is genocide**

#### **Pan Nationalism vs Global Imperialism**

Nationalism remains one of the least understood political systems on earth. As the system that historically succeeded it, the nation-state or more accurately the political/economic state, shows its long term instability as evidenced by global climate change, pollution, the financial failure of neo-liberalism, continuing interventionist wars, lack of culture and internal decay, more people are exploring other forms of government including nationalism.

In a world where human thoughtlessness in the name of enhancing personal wealth is ruining our environment and turning our lives into passages between grey concrete tunnels to fulfil ultimately meaningless tasks, nationalism is a re-assertion of the organic bond between individual and society.

By placing culture before commerce, nationalism advocates a more meaningful daily life. It ends the bad judgment and ugly cities justified by someone somewhere being willing to buy something, regardless of its eventual utility or indirect, socialized costs.

### **Protect Australian Identity**

**The primary aim of Nationalist Alternative is to reaffirm Australian cultural and national identity and restore the sovereignty and independence of the Australian nation.**

Australia like all of Europe and European populated nations such as America, Canada, NZ are at a crossroads. Demographic change via low European birth-rate and immigration threatens to diminish, marginalise and thereafter eliminate people of Australian descent's culture, traditions, ethnicity and identity.

#### **Resist Cultural Imperialism :**

Globalisation reduces every individual to the level of a identity-less worker-consumer drone faithfully practicing the religion of the credit card and reciting the catechism of political correctness.

It prefers humans all think, look and act more or less the same, mere consumers of products living in economic sectors.

**FIGHT with NATIONALIST ALTERNATIVE to restore self esteem and guarantee a future for the Australian nation**
